

DESCRIPTION

The IPW-VPN is a hardware device that allows secure communications to be established over any standard, public, or private network. The IPW-VPN performs behind firewalls and NAT devices and offers encrypted communication for all IP protocols regardless of the type of traffic.

When deployed, the IPW-VPN provides a secure and encrypted tunnel for network communications. This proves beneficial when needing to remotely program or maintain the IX or GT Series.

For best results with the Aiphone IX Series, it is recommended that the IX product be programmed to use multicast.

FEATURES

- Encrypted communication via tunneling
- Supports 30Mbps
- Supports broadcast and multicast
- Supports mesh applications
- Simple installation

SPECIFICATIONS

Power:	12V DC (supplied)
Mounting:	Supplied mounting tabs
Talkpaths:	2
Operating Temp:	-40° ~ 158°F (-40° ~ 70°C)
Dimensions:	7-½" H x 6-½" W x 1-⅛" D

Calling Capacity (default settings)

Feature	Calling via Unicast	Calling via Multicast
1 IX-DV	2 Masters	20 Masters
1 IX-DV (VMS)	2 Masters	20 Masters
1 IX-DV & 1 IP Camera (VMS)	2 Masters	20 Masters

The IPW-VPN is not recommended if using an IX video door station and an IP camera for the picture-in-picture feature.
