## Installation

### Step 1: Wall Bracket Installation Without embedded box in the wall

1 According to the position of the cable in the wall, dig out a square hole (height\*width\*depth =66\*50\*50mm) that can accommodate all cables.

2 Align the square hole of the wall bracket with the hole dug out before, then mark the four fixation holes through bracket on the wall.

3 Take down the bracket, then using a 5mm hand drill to make the four fixation holes on the wall which marked before.

4 Once the fixation holes were made, insert screw fixing seats provided.

# C317X Quick Guide

Twist M3x10.5 screw into the bottom hole of the bracket until the tail of which align to the edge. Then fix the wall bracket on the wall with four ST4x20 screws. If there is a earth wire to be connected, use M3x6 screw to fix it on the wall bracket.

## With embedded box in the wall

Make sure all cables in the embedded box .
