

AXIS Audio Manager Pro

Your gateway to the world of network audio

AXIS Audio Manager Pro provides easy, remote management of large IP audio installations. Take control of your complete audio system from one single user interface which handles, for example, system setup of audio devices, zone management, audio content management, and audio scheduling. AXIS Audio Manager Pro lets you handle live or scheduled announcements, emergency messages, broadcast background music and more, either individually in separate zones or to all the devices in all zones. With intuitive operation and online device status monitoring, AXIS Audio Manager Pro realizes the benefits of network audio. The AXIS Audio Manager Pro software is easy to install and can run both on dedicated hardware or virtual machines.
