

AXIS P12 Network Camera Series

Miniature HDTV cameras for exceptionally discreet surveillance

- > Functional and extremely discreet design
- > Easy and flexible installation
- > HDTV 720p
- > Edge storage
- > Power over Ethernet

AXIS P12 Network Camera Series offers tiny HDTV 720p cameras for exceptionally discreet indoor and outdoor surveillance—ideal for ATMs (automated teller machines), banks, stores, hotels, architectural buildings and offices. The cameras can be installed on or flush-mounted in walls or ceilings, in elevators or in limited spaces such as in ATMs or doorways.

AXIS P12 Series consists of four models. AXIS P1204 and AXIS P1214 are two pinhole models for indoor installations. Two IP66-rated models for indoor and outdoor use are AXIS P1214-E and AXIS P1224-E. The latter has a wide-angle lens.

An AXIS P12 camera comprises two parts: a sensor unit (consisting of the lens and image sensor) with an 8 m (26 ft.) cable, and the main unit (with network, power and input/output connections and a memory card slot). The cable connects the two parts, enabling the sensor unit to be installed discreetly in tight places, and the main unit

to be placed elsewhere. An AXIS P12 can be powered over Ethernet or by an external power supply.

The cameras are ideal for capturing subjects at close range. Varying horizontal field of views, from 57° to 145°, are available.

AXIS P12 cameras offer powerful event management capabilities with intelligent video features such as tampering alarm, motion detection and support for third-party applications.

Miniature HDTV cameras for discreet indoor and outdoor surveillance

AXIS P12 Network Cameras are flexible and easy to install on or behind walls and ceilings, and in very limited spaces. The cameras come with various mounting accessories for indoor or outdoor installations. All AXIS P12 main and sensor units can operate in temperatures from $-20\text{ }^{\circ}\text{C}$ to $50\text{ }^{\circ}\text{C}$ ($-4\text{ }^{\circ}\text{F}$ to $122\text{ }^{\circ}\text{F}$). The outdoor AXIS P1214-E and AXIS P1224-E sensor units have protection against dust, rain, snow and ice.

AXIS P1204 Network Camera

The sensor unit of AXIS P1204 (1) can be mounted on a surface with the supplied cover (2) over top, or angled using the included angled mounting bracket (4). It can also be flush-mounted using the straight mounting bracket (3) in places where a concealed application is required, such as behind a thin metal sheet in a doorway or in an ATM.

AXIS P1214-E Network Camera

The IP66-rated sensor unit of AXIS P1214-E (1) can be mounted flush with a surface using the included mounting bracket (2). It can also be mounted on a surface using the supplied housing (3), which is suited for both indoor and outdoor use. An optional bracket for tilt possibility is also available.

AXIS P1214 Network Camera

The sensor unit of AXIS P1214 (1) can be mounted behind any surface using the supplied mounting bracket (2), with just a small opening for the lens showing on the outside of a ceiling or wall, as illustrated in Figure (3). Sold separately is an optional mounting bracket that allows for tilt possibility.

AXIS P1224-E Network Camera

The IP66-rated sensor unit of AXIS P1224-E (1) can be mounted flush with a surface as shown in Figure (3) using the included mounting bracket (2). An optional bracket for tilt possibility is also available.
