

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

The EPF-VFP-10-XX-SP0011 is a wall mounting bracket for EPF-VFP-10 series explosion proof portable fans. This bracket is used to convert existing EPF-VFP-10 series portable fans into a permanent wall mount circulation fan. The wall mounting bracket is constructed of non sparking aluminum and powder coated with a two part heavy duty black powder coat finish. The rubber feet on existing fans are removed and the feet mounting holes are used for securing the fan to the wall mount bracket. When installed, the fan will be parallel to the wall for providing circulation within closed environments, or pulling air out of the environment with the addition of a fan duct for exhausting.
