

Stanchion Mount Instructions for EPLC2-LED Series

Thank you for your purchase. The stanchion mount attaches to EPLC2-LED series light fixtures. Follow the basic installation steps below to install the mount.

INSTALLATION

1. Prepare your conduit and wiring.
2. Securely thread the stanchion mount onto the appropriate NPT size conduit. *Add thread lubricant to the conduit threads to prevent water from entering the fixture.
3. Tighten set-screw to hold in place.
4. Pull field wiring into cover module.
5. Hang the LED luminaire on the cover module hinge hook.
6. Connect supply wires to luminaire wire leads (or terminal blocks) per the wiring diagrams for the light using methods that comply with all applicable codes. Tighten all electrical connections.
7. Close driver housing onto cover module, making sure that all wires are safely inside driver. Tighten captive closing screw to 30 in.-lbs. (3.4 N-m).
8. Turn power on
