LED-A19-10-E26 10 Watt LED Bulb

Lamp Type: LED

Watts: 10

Lumens: 1050

Dimensions: 60mm-OD, 114mm-H

Voltage: 72V DC

Color: White

CRI: >75 (White)

Dimmable: No

Operating Temp: -50C to 85C

Materials: Aluminum Housing - Polycarbonate Lens

Features

UL Listed

U.L Approval: [U.S Certificate](#)

50,000 Hour Life Rating

Direct Replacement for A19 Bulbs

Rough service

The Larson Electronics LED-A19-10-E26-72VDC Directional 10 Watt LED A19 Style Bulb is designed with rough service to fit in standard light bulb sockets but provides durability and multi color adjustability that makes it ideal for industrial and commercial applications. This 10 watt LED replacement bulb provides 1050 lumens from only 10 watts.

The LED-A19-10-E26 is a directional LED light bulb that can serve as an A19 LED upgrade from standard light bulbs fitting E26 bulb sockets. Utilizing only 10 Watts and designed to operate with 72 Volts DC, this lamp provides higher efficiency than traditional incandescent A19 bulbs and is a direct fit replacement. The A19 is the same base and dimensions as a standard A19 incandescent light bulb, meaning you can use this LED light bulb as a replacement for a standard household incandescent and compact fluorescent bulbs. However, given the durability and longevity of this LED design, we see this LED light bulb as an ideal solution for a variety of business and industrial uses.

This lamp has an acceptable operating temperature range of -20C to 85C and an operational life of 50,000 hours. The solid state design of this lamp means it is resistant to the effects of impacts and vibrations, providing adding durability to withstand conditions that would cause a normal incandescent bulb to fail. The overall dimensions of the LED light are the same as a standard A19 incandescent lamp, and the base is constructed of aluminum for durability and resistance to rust and corrosion.

The LED-A19-10-E26 is the ideal upgrade and/or replacement for directional hand lamps and drop lights. This bulb produces nearly 20% more light at 5 feet than a standard 100 watt rough service bulb. Combined with a "cool white" color output, this bulb is ideal for improving the light output of hand lamps, drop lights, and other standard incandescent lighting within industrial applications.

The E26/E26 base is the same screw in base that the standard light bulb in the US and Europe. You can use this LED light bulb in a standard lamp in your home. However, given the durability and longevity, we also see this LED light bulb as an ideal solution for sealed hand lamps and drop lights that usually involve replace seals, gaskets, etc. when relamping. As such, this LED light bulb can provide additional safety measures and time savings, given the low heat production and that it does not require replacing for 50,000 hours. Since the LED bulb uses solid state technology, the vibration (dropping, etc.) that degrades conventional incandescent bulbs is not an issue with these LED bulbs.

Frequently Asked Questions (FAQ)

Warranty: 12 Months

Options:

-Color Temp

Example: -60K

Color Temp	
WHITE 6000K	-60K
WHITE 5000K	-50K
WHITE 4300K	-43K
WHITE 4000K	-40K
WHITE 3000K	-30K
