

12 Watt RGB LED A19 Style Remote Control Light - Dimmable - Color Changing Bulb - Standard E26 Base

LED-A19-12W-E26-RGB

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

LED-A19-12W-E26-RGB

Lamp Type: RGB LED

Number of LEDs: (4) 3 Watt LEDs

Dimensions: 60mm-OD, 114mm-H

Watts: 12

Voltage: 100-277 VAC 50/60hz

Operation: Remote Control

Color: Red, Green, Blue, White - Adjustable, 16 Color Settings

Beam Angle: 25 Degree Spot OR 60 Degree Flood

CRI: >75 (White)

Dimmable: YES

Operating Temp: -55°C to +85°C

Remote Specs:

Infrared signal to control light

120 Degree receiver

Working distance up to 25' from fixture

Can control multiple lamps with one remote

The Larson Electronics LED-A19-12W-E26-RGB 12 Watt RGB LED A19 Remote Control Light is designed to fit in standard light bulb sockets but provides durability and multi color adjustability that makes it ideal for industrial and commercial applications. This 12 watt LED light offers 26 color settings, remote control operation, and the efficiency, durability and long life of LED operation.

The LED-A19-12W-E26-RGB is an LED light bulb that can serve as an A19 LED upgrade from standard light bulbs fitting E26 bulb sockets. Utilizing only 12 Watts and designed to operate with 100-277 Volts AC, this lamp provides higher efficiency than traditional incandescent A19 bulbs and is a direct fit replacement. The A19 is the same base and dimensions as a standard A19 incandescent light bulb, meaning you can use this LED light bulb as a replacement for a standard outdoor flood lamp. However, given the durability and longevity of this LED design, we see this LED light bulb as an ideal solution for a variety of industrial uses.

This LED bulb is an RGB unit, meaning it can produce red, green and blue light of varying levels and intensity. Operators can choose from 16 preset color selections by using an included handheld remote. This LED light is also dimmable, and can be set to operate in different modes including steady burn, flash, strobe, color fade, and smooth fade. Users can also turn the lamp on/off via remote control.

The remote control included with this multi color LED lamp is an infra red control unit with a working distance of 25 feet. This remote control capability is ideal for operators who install these bulbs in hard to reach or elevated locations, allowing them to change the color and operating modes of the lamp quickly and easily. The remote can be used to control multiple lamps, and on/off control can be remotely managed as well.

This lamp has an acceptable operating temperature range of -55°C to +85°C and an operational life of 50,000 hours. The solid state design of this lamp means it is resistant to the effects of impacts and vibrations, providing adding durability to withstand conditions that would cause a normal incandescent bulb to fail. The overall dimensions of the remote controlled LED light are the same as a standard A19 incandescent lamp, and the base is constructed of aluminum for durability and resistance to rust and corrosion.
