

Colored LED Light Bulb - 7 watt LED A19 Style Replacement for Standard E26 Light Bulb Socket **LED-A19-7W-E26**

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

LED-A19-7W-E26 7 Watt LED Bulb

Lamp Type: LED

Watts: 7

Lumens:

Dimensions: 60mm-OD, 114mm-H

Voltage: 100-277 VAC 50/60hz - 12-28 VDC

Color: Red, Blue, Green, Amber options

CRI:

Dimmable: No

Operating Temp: -40°C to 65°C

Materials: Aluminum Housing - Polycarbonate Lens

Features

WRK Listed

50,000 Hour Life Rating

Direct Replacement for A19 Bulbs

The Larson Electronics LED-A19-7W-E26 Directional 7 Watt Colored LED A19 Style Bulb is designed with rough service to fit in standard light bulb sockets but provides durability and multi color adjustability that makes it ideal for industrial and commercial applications.

The LED-A19-7W-E26 is a colored LED light bulb that can serve as an A19 LED upgrade from standard light bulbs fitting E26 bulb sockets. Utilizing only 7 Watts and designed to operate with 100-277 Volts AC or 12-28 Volts DC, this lamp provides higher efficiency than traditional incandescent A19 bulbs with colored coatings or gel lenses, and is a direct fit replacement. The A19 is the same base and dimensions as a standard A19 incandescent light bulb, meaning you can use this LED light bulb as a replacement for a standard household incandescent and compact fluorescent bulbs. However, given the durability and longevity of this LED design, we see this LED light bulb as an ideal solution for a variety of business and industrial uses.

This lamp has an acceptable operating temperature range of -20C to 85C and an operational life of 50,000 hours. The solid state design of this lamp means it is resistant to the effects of impacts and vibrations, providing adding durability to withstand conditions that would cause a normal incandescent bulb to fail. The overall dimensions of the LED light are the same as a standard A19 incandescent lamp, and the base is constructed of aluminum for durability and resistance to rust and corrosion.

The LED-A19-7W-E26 is the ideal upgrade and/or replacement for directional hand lamps and

drop lights. This bulb produces nearly 20% more light at 5 feet than a standard 100 watt rough service bulb. Combined with color output options of red, blue, green, and amber, this bulb is ideal for improving the light output of hand lamps, drop lights, and other standard incandescent lighting within industrial applications.

The E26/E26 base is the same screw in base that the standard light bulb in the US and Europe. You can use this LED light bulb in a standard lamp in your home. However, given the durability and longevity, we also see this LED light bulb as an ideal solution for sealed hand lamps and drop lights that usually involve replace seals, gaskets, etc. when relamping. As such, this LED light bulb can provide additional safety measures and time savings, given the low heat production and that it does not require replacing for 50,000 hours. Since the LED bulb uses solid state technology, the vibration (dropping, etc.) that degrades conventional incandescent bulbs is not an issue with these LED bulbs.

Frequently Asked Questions (FAQ)

Warranty: 12 Months

Options:

LED-A19-7W-E26-Voltage-Color

Example: LED-A19-7W-E26-1227-BLU

Voltage	
120-277V AC	-1227
12-24V	-1224

Color	
BLUE	-BLU
RED	-RED
GREEN	-GRN
AMBER	-AMB
WHITE	-WHT
PURPLE	-PRP
