**The Larson Electronics LED-AR111-12W-G53 12 Watt Low Voltage LED is designed to replace traditional metal halide and halogen lights and provides high durability which makes it ideal for industrial and commercial applications. This 12 watt LED replacement bulb provides 1200 lumens from only 12 watts.**

The LED-AR111-12W-G53 is an LED light bulb that can serve as an upgrade from standard light bulb. Utilizing only 12 Watts and designed to operate with 12 Volts DC, this lamp provides higher efficiency than traditional incandescent bulbs. This LED features a push-in or screw terminal for easy installation. Given the durability and longevity of this LED design, we see this LED light bulb as an ideal solution for a variety of business and industrial uses.

Larson Electronics is a manufacturer and as such can build stationary and portable transformer systems to your specifications. Although we carry several models of power distribution transformer systems, we can deliver custom ordered units almost as quickly as our prebuilt units. If this model does not meet your needs, please contact us at 1-800-369-6671 or [sales@larsonelectronics.com](mailto:sales@larsonelectronics.com) to discuss your specific requirements.
