**LED-PAR30-13-E26-120V-50K 13 Watt LED Bulb**

**Lamp Type:** LED  
**Watts:** 13  
**Lumens:** 1050  
**Dimensions:** 3.74" in diameter  
**Beam Config:** 40°  
**Voltage:** 120 VAC  
**Amps:** 0.9 VAC  
**Color:** 5000K  
**CRI:** >80 (White)  
**Operating Temp:** -20C to 40C  
**Materials:** Aluminum Base

**Features**

ETL Listed  
25,000 Hour Life Rating  
Direct Replacement for PAR30 Bulbs  
For Indoor Use

**Special Orders- Requirements**

**The Larson Electronics LED-PAR30-13-E26-120V-50K 13 Watt LED Style Bulb is designed to fit in standard light bulb sockets and provides durability and multi color options that makes it ideal for industrial and commercial applications. This 13 watt LED replacement bulb provides 1050 lumens and is rated for indoor use.**

The LED-PAR30-13-E26-120V-50K is an indoor space rated waterproof LED light bulb that can serve as a PAR30 LED upgrade from standard light bulbs fitting E26 bulb sockets. Utilizing only 13 Watts and designed to operate with 120 Volts AC, this lamp provides higher efficiency than traditional incandescent PAR30 bulbs and is a direct fit replacement.

This lamp has an acceptable operating temperature range of -20C to 40C and an operational life of 25,000 hours. The solid state design of this lamp means it is resistant to the effects of impacts and vibrations, providing adding durability to withstand conditions that would cause a normal incandescent bulb to fail. The overall dimensions of the remote controlled LED light are the same as a standard PAR30 incandescent lamp, and the base is constructed of aluminum for durability and resistance to rust and corrosion.

The PAR30 is the same base and dimensions as a standard PAR30 incandescent light bulb. You can use this LED light bulb as a replacement for a standard outdoor flood lamp in your home. However, given the durability and longevity, we also see this LED light bulb as an ideal solution for a variety of industrial uses. As such, this LED light bulb can provide additional safety measures and time savings, given the

low heat production and that it does not require replacing for 25,000 hours. Since the LED bulb uses solid state technology, the vibration (dropping, etc.) that degrades conventional incandescent bulbs is not an issue with these LED bulbs. The LED-PAR30-13-E26-120V-50K is the ideal upgrade and/or replacement for indoor lights around the home or business. This bulb produces nearly 30% more light at 10 feet than a standard 300 watt rough service bulb. Combined with a "pure white" color output, this bulb is ideal for improving the light output of a number of lamps in indoor settings in the home, such as in the kitchen and dining room areas, and even bathroom and laundry rooms, as their housing is waterproof. These PAR30 lamps are also ideal fits for recessed par cans for illuminating indoor plays and concerts.

### **Superior LED Benefits**

1. 25,000+ hour lifespan.
  2. Can SAVE 50% or more on energy.
  3. 100% recyclable.
  4. No toxins-lead, mercury.
  5. No UV light, infrared radiation or CO2 emissions.
  6. Bright, even light maintains consistent color over time.
  7. Instant on/off – No flickering, delays or buzzing.
  8. Very good color rendering.
  9. Vibration/impact resistant.
  10. Significantly cooler operation.
  11. Less frequent outages, higher output improves workplace safety.
