Linear X3 for F/BNC/RCA

LinearX Compression Tools

The Linear X Compression Tools are the newest addition to the IDEAL offering of termination tools for coaxial compression connectors. Linear X brings several of the qualities and features of our professional OmniSeal™ Pro Series of tools into a smaller, simpler, value priced tool. These are ideal for installers that are converting from traditional crimping tools or those that only occasionally work with coaxial cable terminations.

Manufactured by IDEAL in Sycamore, IL, these durable tools are designed and manufactured using all metal components - no plastic pieces to wear out or crack. The painted zinc die-cast body and embossed logo are qualities typically found only on products costing several times that of the Linear X.

The handle has a double dipped textured cushion grip for comfort and all-day use. The handle design has a shorter spread distance in the open position for a comfortable compression cycle for all users. One handed operation is possible with all compatible connectors. A hinged hasp keeps the tool in a compact closed position when not in use.

The Linear X1 is our fixed model designed for F connectors. It is factory calibrated and set to compress industry standard 21mm F compression connectors. This includes the entire family of IDEAL F connectors for RG6/RG6 Quad/RG59. No adjustments to the tool are needed. Great for installers who primarily work with F connectors and want a consistent stroke length and compression cycle, without the worry that the tool is set on an incorrect setting.

The Linear X3 adds an adjustability feature and is designed for F/BNC/RCA connectors. The post can be raised or lowered to accommodate different sizes and types of compression connectors. No separate or loose adapters are required for BNC or RCA connectors. This tool is for installers who work with multiple types of connectors looking for an economical all-in-one product as an alternative to traditional crimping tools. The Linear X3 is Designed for installers of CCTV, Audio/Video, and CATV/SATV systems. It is compatible with all IDEAL F/BNC/RCA compression connectors for RG6/RG6 Quad/RG59.

The 33-631 Linear X1 and the 33-632 Linear X3 tools each include 4 IDEAL RTQ™ F Compression Connectors with purchase.

Linear X3 adjustable post

WeatherProof™ Connectors

- Solid brass body
- Compatible with RG-6 Regular/Tri/Quad shield cable
- Indoor/Outdoor applications
- For applications up to 3GHz

Cat. No.	Description
33-631	LinearX1 F-Compression Tool (Fixed) with four RTQ™ F-Connectors
33-632	LinearX3 F/BNC/RCA Compression Tool (Adjustable) with four RTQ™ F-Connectors
