M12™ Heated TOUGHSHELL™ Jacket Kit

★★★★★ (0) Write a review

Powered by M12™ REDLITHIUM™ Battery Technology, Milwaukee® M12™ Heated ToughShell™ Jackets use carbon fiber heating elements to create and distribute heat to the chest, back, and front hand pockets. A one-touch LED controller allows users to select from three heat settings, delivering ideal heat for any environment. The new Quick-Heat function allows users to feel heat 3X faster than previous jackets and market competitors. For use in abrasive environments, ToughShell™ Stretch Polyester delivers 5X Longer Life than previous softshell jackets, and provides wind and water resistance to survive the elements.
