

**DESCRIPTION:**

The MH-15W is a robust, weather-resistant paging horn. Featuring all-metal construction, a wide frequency response, and external adjustable power taps, the MH-15W is suitable for demanding environments and installations.

The MH-15W can be used for 25V or 70V paging systems and can be connected directly to an 8Ω output. It can be used with intercom systems for two-way communication that require an 8Ω direct tap.

The horn mounts directly to a flat surface and can be adjusted to the desired angle.

FEATURES:

- Lightweight aluminum horn
- Weatherproof and waterproof construction
- Universal metal mounting bracket
- Built-in transformer for 100/70/25V systems
- 8Ω direct tap

SPEAKER SPECIFICATIONS:

Power rating: 15W maximum

Frequency response: 375-14,000Hz

Sensitivity: 120dB (measured 1 meter on axis with 15W input)

Dispersion: 110°

Finish: Baked dark gray enamel

Material: Spun aluminum (horn body)
Die cast aluminum (driver unit housing)

Net weight: 4.6 lbs (2.1 kg approx.)

Power on Tap:
