# AXIS Fence Guard
## Robust, installer-friendly perimeter protection

AXIS Fence Guard is a robust tripwire application designed for protecting fenced-off areas from intrusion. The application automatically triggers an alarm when it detects a moving object, for example a person or vehicle, crossing a defined virtual line. It is typically for use in after-hours monitoring of office buildings, industrial properties, vehicle depots and other fenced-off areas. It is easy to set up and configure, with an intuitive user interface, contextual help and smart configuration options.

> **Robust perimeter detection**
> **Multiple profiles**
> **Intuitive configuration**
> **Easy installation**

## AXIS Fence Guard

### Application

| | |
|---|---|
| **Supported products** | Fixed cameras and selected video encoders with support for AXIS Camera Application Platform and compatible firmware. For a complete list, please visit: www.axis.com |
| **Settings** | One single or multi-direction tripwire per profile (6 point line) Up to 3 concurrent profiles Visual confirmation to verify setup Axis False Alarm Filtering for short-lived objects and small objects Perspective calibration |
| **Configuration** | Web configuration interface included |
