NOTE: Download All Your Support Materials and Tools in One Place

1. Go to: http://www.digital-watchdog.com/support-download/

2. Search you product by entering the part number in the 'Search by Product' search bar. Results for applicable part numbers will populate automatically based on the part number you enter.

3. Click 'Search'. All supported materials, including manuals, Quick Start Guide (QSG), software and firmware will appear in the results.

Attention: This document is intended to serve as a quick reference for initial set-up. See the DW Spectrum full manual for more information on features and functionality.

HARDWARE

SETTING UP THE BLACKJACK® NAS

STEP 1: Connecting the power cable.

- 1. Connect the power cable to the DC power port. The device will automatically power on.
- 2. You can check whether the power is on at the front power LED.

STEP 2: Connecting to the Network

- 1. Locate the network switch where the DW Spectrum® IPVMS server is connected to.
 - (Blackjack® NAS must be on the same network as the DW Spectrum® IPVMS server where it will be added to).
- 2. Connect the network cable to the network port and to the network switch. (network cable not included).

- 1. From the Windows based Blackjack[®] server or any Windows[®] PC, open DW IP Finder[™] by double click on the DW IP Finder[™] icon w on the Desktop or click on DW IP Finder[™] from Start Menu > All Programs > DW IP Finder.
- 2. If the DW IP Finder[™] is not installed or not the latest version, download and install from <u>http://digital-watchdog.com/support</u>.
 - Under Software, select DW IP Finder™ from the dropdown list.
 - Then go to downloads section and expand software/firmware.
 - Click on the download icon to download the DW IP Finder™.
 - Then install the DW IP Finder[™] by following the installation wizard.
 - * Requires DW IP Finder[™] 4.3.15 or later version.

3. When the DW IP Finder[™] is opened, it will scan and list all the DW cameras and Blackjack[®] NAS that are on the selected network.

4. If the Blackjack[®] NAS is not listed, change the Network^{*} by clicking the drop down and select another network if exist. Then click Find Devices to scan the network for the Blackjack[®] NAS.

- If it's showing incorrect network, select the correct network from the dropdown list.

Network Local Area Connection 3 [192.168.1.180] 🔽

5. Find the Blackjack[®] NAS from the list, then either double click on the Blackjack NAS or click on the Click under the IP Conf column.
