

KT-1 Starter

Access Control Kits

KT-1 Access Control Kits include all of the essentials needed to get up and running quickly and easily, at an affordable price. Available in different mounting configurations – single gang mount (KT-1) or cabinet mount options (KT1-PCB), the KT-1 kits are an ideal way to experience the rich user features that Kantech brings to single door installations. Included in the kits is the KT-1 hardware, Kantech ioProx reader (P225XSF), EntraPass security management software (v6.02 and higher), as well as all the peripherals and credentials in between; making the starter kits an all-inclusive access control offering.

“Affordable, easy to implement access control”

KT-1 Expansion

Access Control Kits

KT-1 expansion Kits offer a comprehensive and easy-to-install solution for businesses to expand the size and scope of their existing access control system. Larger enterprises can also use the kits to seamlessly scale their system and secure remote sites. KT-1 expansion kits are ideal for existing customers that wish to expand security and don't require extra EntraPass software licenses or further credentials.
