

ioProx

Receiver and Wireless Transmitter

The ioProx Transmitter is ideal for long-range (up to 45 m/150 ft) applications such as opening parking gates. The transmitter is available with an optional integrated ioProx tag, which can be read by an ioProx card reader, making it an ideal solution to access both a parking facility and an office building without searching for multiple access cards. The ioProx transmitter uses radio-frequency (RF) technology secured with encrypted coding. The ioProx Receiver is field selectable for either 26-bit Wiegand format or for Kantech Extended Secure Format (XSF).

Magnetic Stripe Readers and Cards

Polaris magnetic stripe readers and cards combine quality, reliability and installation flexibility. Rugged and affordable, the readers mount on a wall or door mullion. A simple motion through the card slot (in either direction) reads a card. A bi-color LED flashes to confirm that a card has been read. The LED changes color when the door unlocks. Polaris integrates with an access control system using either 26-bit/34-bit/ABA) Wiegand or ABA-Clock-and-Data input. Integrated keypad model available for dual authentication.
