LED Assembly

On-Off Switch

Left Housing Halve

Battery Terminal Block

Be sure that all mechanical and electrical components are placed firmly and squarely in corresponding cavities of left housing halve.

Be very careful and make sure that all wires and wire ribbons are placed firmly down in wire channels and traps.

Make sure there are no interferences when installing the right housing halve.

Prior to installing battery, check for proper functionality of shuttles and on-off switch.

Install battery and assure the tool operates correctly.

NOTE:
Service replacement of Electronics Assembly has two possible switch designs. Even though the wiring may be a little different, the service replacement electronics assembly is completely interchangeable with the production assembly. Be sure to follow the instructions above.
