ABOUT THE 1500 SERIES HOSPITAL LATCHES

Trimco's 1500 Series Push/Pull Latches features a sleekly designed, cold-forged steel base assembly. This refinement allows for improved lever action and simple field reversibility, regardless of the door hand or function. The new base design allows the distributor to stock Trimco latches without having to maintain inventory for several different functions or door hands. Trimco's 1560 and 1580 latches are approved by Underwriter's Laboratories for use on fire-rated openings up to and including 3 hours..

FEATURES

- Lever pads and latch covers manufactured from bronze, brass or antimicrobial copper material are suitable for heavy duty use.
- Listed by Underwriter's Laboratory and approved for use by the Veteran's Administration.
- Compact design - less than 50% the projection of other Push/Pull latches.
- Options including multiple functions, tubular or mortise locks, engraving, Torx screws and different combinations of paddles up and down.
- Meets ADA requirements.

APPLICATIONS

- Hospitals & Healthcare
- Facility Restrooms
- Nursing Facilities
- Kitchens

MORTISE FUNCTIONS

10	Passage
