MADE IN FRANCE

rostaing.com/scanforce

NATIONAL, INTERNATIONAL AND PRIVATE SECURITY CHALLENGES ARE GETTING BIGGER ...

The **security** of territories, people and property is intensifying, and the **fight against terrorism** has become one of the everyday tasks for law and order personnel and security services.

SCANFORCE is a solution that **revolutionises and facilitates** security personnel's missions **anywhere**.

ROSTAING®

TALENTS IN HANDS

...ROSTAING INNOVATES AND REVOLUTIONISES SECURITY CHECKS

with a solution **SCANFORCE** to multiply and facilitate security checks.

A **line of invisible hands-free metal detector gloves and accessories**, perfectly adapted to all **security checking missions**.

CHECK WITHOUT YOUR HANDS BEING FULL?

SEARCH 30,000 PEOPLE IN 2 HOURS WITH YOUR SECURITY TEAM?

SCANFORCE
ROSTAING®

MAX INVISIBLE DETECTION

SCANFORCE is an **invisible metal detector glove**, designed, and manufactured in France using French technology.

TOTAL REACTIVITY

It is used to check and filter people **while keeping the hands free to intervene** if the situation requires: handcuffing, immobilisation techniques, use of weapons...

Long autonomy

3 weeks for detection*
Automatic switch to standby mode.

ON/OFF

Searching without physical contact: detection sensitivity distance of 4 to 5 cm making it possible for the operator to focus on their action.

Discrete warning: during the search, a vibration discretely warns the wearer and not the person being checked.

SCANFORCE can detect a handgun, a knife or any other small metal objects the size of a paper clip.

SCANFORCE®

ROSTAING®

PERFORMANCES

Search speed: equipment of both gloves to improve search or filtering effectiveness.

Hands free: built-in miniaturised, ultra lightweight system with permanent detection.

Maximum reactivity: hands free with total freedom to act.

Search without physical contact: detection sensitivity distance of 4 to 5 cm making it possible for the operator to focus on their action.

Invisible system: the control box is invisible to the naked eye.

Patented French system: French design, technology and manufacture:

Discrete vibration: the vibration is felt in the palm of the hand to warn of the presence of a metal object, only the wearer feels it, giving them a head start in the event of action to be taken.

Detection accuracy: can detect a pin head, steel clip, paper clip...

***Long autonomy** 120 hours of operation for permanent detection.

ON/OFF button + automatic standby: the 9 volt battery powers off after 15 minutes without activity.

Selective detection: surgical steel is not detected (teeth, prostheses...etc.), Pacemaker certification.
