3.6-11mm VARIFOCA LENS, INFRARED/ INTENSIFIER, INDOOR/ OUTDOOR IP DOME

4K

- Up to 130' IR Range
- Motorized Auto Focus Variable Lens
- IP66- Weather Resistant
- IK10- Vandal Resistant
- True WDR Operation
- Operates in (-)40°F
- Micro SD Card Slot
- 3.5mm Mic. Input/ 3.5mm Audio Output

•Flexible Intensifier® Technology to fit any lighting application

- Intensifier® mode allows for a vivid color image without IR LEDs in low light
- Built-in standard PoE (IEEE 802.3af)
- H.265/ H.264/ MJPEG codecs
- 3.5mm Mic Input/ 3.5mm Audio Output
- Conformant with ONVIF Profile S
- Junction Box Included
- 5 Year Warranty

LONG RANGE ETHERNET ADAPTER KIT

These plug and play units facilitate cost effective solutions for IP devices that need to be installed at distances greater than 100m. Transmits data at 100mbps full duplex and power via a single twisted pair (UTP) or Cat5e/6 cable in a PoE(+) compliant format.

PACE1PRMT.....\$ 295.00

POE SWITCHES

Outdoor Rated 4 and 8 PoE Port 10/100 802.3af/at Switches

- Power IP cameras via Power over Ethernet
- Ethernet speed up to 10/100MBPS
- Meets IEEE 802.3af/at Ethernet standard
- 4 PoE ports with uplink
- 2 Year Warranty

P4S50: 5 Port, IP65 Rated 4 Port POE.....\$ 99.00
P8S90: 9 Port, IP65 Rated 8 Port POE.....\$ 125.00

Gigabit PoE Network Switches

- Gigabit performance on all ports (uplink and downlink)
- CCTV mode isolates each port from one another for added security and performance
- Includes built-in surge immunity
- 10/100/1000 speed
- 802.3af/at
- 2 Year Warranty

P4S5G: 5 Port Gigabit Network Switch (4 ports PoE, 1 port Uplink)\$ 77.00
P8S9G: 9 Port Gigabit Network Switch (8 ports PoE, 1 port Uplink)\$ 173.00
P24S26G: 26 Port Gigabit Network Switch (24 ports PoE, 2 port Uplink)\$ 310.00

36-Port Managed Gigabit Switch with 32-ports PoE and 4xSFP Uplink

- Layer-2 managed switch (supporting PoE function)
- 32 x 10/100/1000Mbps adaptive RJ45 ports and 4 x SFP Gigabit optical ports. Two SFP to RJ45 adapters included.
- Each RJ45 port supports MDI/MDIX auto flip and wire-speed forwarding functions.
- Ports 1-32 support Power over Ethernet and follows the IEEE802.3af/at standard.

- Supports: 720p@25/30/50/60, 1080p@25/30Hz
- Built-in loopout •Built-in LED lights on unit to indicate selction •OSD displayed on monitor to indicate input/ output settings •Includes 12V power supply

TVIHD.....\$ 87.99

VGA to BNC CONVERTER

- Connects VGA output to existing TV or CRT monitor
- Resolutions supported: 640 x 480, 800 x 600, 1024 x 768
- Dual output ports: Composite Video (BNC), VGA (DB15)
- On-screen display background
- Simple and quick to install
- Windows and Mac compatible

VGABNC.....\$ 65.99

HIGH RESOLUTION VIDEO to VGA CONVERTER

- Allows composite video output to play on a VGA monitor (CRT or LCD)
- Dual output: BNC x 1 for TV monitor and DB15 x 1 for VGA monitor
- Hi-rez VGA display up to 1280 x 1024@60Hz
- Freq. output: 69Hz- 85Hz

BNCVGAHR.....\$ 95.00

CAT5/ VGA EXTENDER

- Operate your VGA monitor up to 440' from your PC
- Includes 2 units: transmitter and receiver
- Transmitter built-in virtual DDC to avoid improper setting for resolution & frequency and built-in sync mode selection for signal stability
- Supports up to 1290 x 1024 pixels
- Extend via CAT5e/ 6 instead of VGA cable
- No power required

VGA135.....\$ 71.99

VGA & AUDIO to HDMI CONVERTER

- Converts VGA & analog stereo or digital audio (SPDIF) to HDMI
- Supports HDMI & DVI output mode (HDMI to DVI cable not included)
- Encodes analog stereo audio or digital audio onto the video signal for HDMI combined audio and video
- Built-in auto selection of analog or digital audio
- Supports PC resolution up to 1920x1200
- VGA and Audio to HDMI Converter

VGAHD2.....\$ 82.00

UTP VIDEO/ DATA SURGE PROTECTOR

- Perfect for video or data signal protection
- Max Power Input: AC 40V, DC 56V
- Two Stage protection: AC/DC 130V, AC/DC 12V
- 2.56" x 1" x 1"

SPUTPVD.....\$ 16.99

COAXIAL VIDEO SURGE PROTECTOR TVI, CVI, AHD, 960H

- BNC male to BNC female
- Provides Protection for Analog TVI, CVI, AHD, and CVBS Cameras
- Complies with IEC61000-4-5
- Built-In EFT (Impulse Noise) Lightning Protection
- Sold Individually, but recommended to use in pairs

SPCOAX2.....\$ 15.99

VIDEO & POWER SURGE PROTECTOR

- 3 Pin Terminal + BNC Female to 2 Pin Terminal + BNC Female
- High-Frequency for both CCTV and CATV use
- Power Input: AC40V (Max), DC56V (Max)
- 3.44" x 2.44" x 1"

SPVP.....\$ 33.50

HD-TVII VIDEO & POWER SURGE PROTECTOR

- Helps protect HD-TVII cameras, as well as AHD/HD-CVI/CVBS formats, from lightning strikes and power surges
- Resolution up to 4K
- Supports power input up to AC40V/ DC56V
- Response time less than 1 ns

SPTVIVP.....\$ 33.50

AUDIO CAT5 EXTENDER-TERMINAL TERMINATION

- Sold in pairs
- Gold-plated RCA female to RJ45
- Used in pairs via one CAT5 UTP cable to send audio signal of up to 1 mile
- 20Hz-20kHz bandwidth
- For 75-120 ohm cable
- High performance to eliminate audio ground loop problem
- No power required

UTPAUDIO: MONO.....\$ 19.00/ PAIR

VIDEO, POWER & DATA PASSIVE TRANSCEIVER

- Transmit or Receive real-time color or B&W video signal
- Color video up to 1300ft (400m) in pairs via UTP Cat5e/6
- Power signal up to 820ft (250m) in pairs; 12V/24V, DC/AC
- Transmit PTZ data signal up to 1000ft (300m) in pairs
- Built-in TVS for surge protection

EV01P-VPD.....\$ 16.00/ PAIR

PoE SURGE PROTECTOR

- Protects PoE equipment from high voltage surges
- Offers protection to power and signal line
- 10/100 Base-T compatible
- Supports Midspan and Endspan PoE units
- IEEE 802.3af, IEEE 802.3a compatible
- Complies with IEC61000-4-5 2nd edition

SPPOE2.....\$ 29.50

VIDEO & POWER PASSIVE TRANSCEIVER for HD-TVII

- Transmit or Receive real-time color or B&W video signal
- Color video up to 1300ft (400m) in pairs via UTP Cat5e/6
- Power signal up to 820ft (250m) in pairs; 12V/24V, DC/AC
- Built-in TVS for surge protection

HD-EV01P-VP.....\$ 14.00/ PAIR

HD-TVII VIDEO BALUN

- Send HD-TVII signal up to 656' over UTP cable
- Passive, No power required
- Built in ESD, EFT (impulse noise), lightning (surge) and transient protection

TVI-UTP.....\$ 4.99 ea.

TVIUTPPT- PIGTAIL.....\$ 6.99 ea.

Same as TVIUTP, but with: BNC male to screw terminal with 4" coax pigtail cable for easy connection.

OPERATE A 12Vdc CAMERA IN A 24Va SYSTEM

- Operate your 12Vdc cameras on a variety of voltages
- Regulated 12Vdc output @ 500 mA
- Accepts 15 to 30Vdc, 20 to 28Vac and converts it to 12Vdc
- Voltage input via 2-pin terminal block
- Mechanical: Converter is 63x29x25mm; Input and output cables are 15cm each

CM-RQE70

PIR 'REQUEST TO EXIT' DETECTORS

Camden Door Controls, CM-RQE70 PIR 'REQUEST TO EXIT' Detectors provide the latest word in design, with a complete list of "high performance" features, including secondary activation device input, door monitoring, two relay outputs, and tamper alarm.

Many new programming, installation, and set-up features that have never previously been available. Camden started by making the CM-RQE70 smaller, so it can easily fit on door frames, and then made installing the detector faster and easier. CM-RQE70 comes with 4 factory default operating modes that can be selected with simple push buttons on the circuit board.

Have an unusual installation and need custom settings? No problem, you can use the on-board push buttons to customize the default operating modes or program your own custom operating mode.

Camden also makes detector mounting and wiring easier with a simple plug-in wiring harness. CM-RQE70 isn't just a new REX detector, it's a whole new approach to REX detector design!

- Compact size, designed to mount on door frames
- Easy to use on-board programming buttons. No dip switches
- (4) Factory default operating modes, with the ability to customize mode attributes
- Plug-in wiring harness, makes installation easy and fast
- Selectable fail safe/fail secure
- (2) Form 'C' contacts
- Momentary and latching relay modes
- Secondary activation device input
- Card/keypad input
- Door position switch input
- Request to Exit input
- Built-in sounder (adjustable)
- Tamper switch

CM-9700/9710

2" PIEZOELECTRIC PUSH/ EXIT SWITCH VANDAL RESISTANT

CM-9700 and CM-9710 Series surface mount piezoelectric push/exit switches are virtually impervious to weather and vandalism due to their unique one-piece aluminum construction and non-moving part design. The switches do not require power to operate.

This switch is intended for connection to 'low load' access control systems. An external relay is typically required for connection to 'high loads', such as electric strikes and magnetic locks. Not recommended for control of automatic doors.

CM-9600/9610

ILLUMINATED PIEZOELECTRIC PUSH/ EXIT SWITCH VANDAL RESISTANT

CM-9600 and CM-9610 Series flush mount illuminated piezo push switches offer high visibility and weather/ vandal resistance. The units feature a heavy duty stainless steel faceplate and adjustable 40 second timer.

CM-9600 is single gang width (2 3/4") and the CM-9610 is only 1" & 3/4" wide, perfect for door frames or narrow areas. The large 1" round diameter button is easy to activate. Illumination and power relay is 12 to 24 VDC.

Switch illumination is jumper selectable and may be set for On, Off, Green to Red, Red to Green or non-lit operation. Field selectable for N/O or N/C contact output and fail safe/fail secure operation.

- Rugged stainless steel face plate
- Red and/or green illumination
- Fail safe / non fail safe selectable
- N/O & N/C outputs
- Integrated adjustable 40 second timer
- 12/24Vdc
- Lifetime Warranty

CM-330 Series

CM-330, 324 & 325 SUREWAVE™ TOUCHLESS SWITCHES ADA COMPLIANT

CM-330 Series are 2nd generation hands-free switches from Camden Controls.

CM-330 and CM-333 battery powered models supplied with (2) AA alkaline batteries. -Lithium battery recommended for environments below 0C (32F). To order, select option below.

CM-324 Series (original) single relay wired hands-free switches features an operating range of 1-26", adjustable time delay of 1-5 seconds, and provides superior performance in all ambient lighting conditions.

CM-325 Series hands-free switches are specifically designed for use in healthcare and other facilities where highly reflective surfaces (such as chrome or polished stainless steel, cause standard touchless switches to false activate.

- Wired, wireless and hybrid (wirless/wired) models •Indoor/outdoor use. -4° F TO +153° F (-20° C TO +85° C) operating temp. Gasket included in package
- Battery powered wireless models offer 2 yr. battery life using standard 'AA' alkaline batteries. •Line powered models offer 12/24V, AC/DC operation •1 and 2 relay wired models, SPDT, Form 'C' •Narrow (jamb), single and double gang faceplates
- Polycarbonate (black) and stainless steel faceplates •Advanced active infra-red technology with fast response •Heavy duty 3 or 5 Amp rated relay
- Adjustable operating range up to 28", refer to model specification

- CM-331/332 Series: Selectable auto range (operation) mode of up to 6"
- Adjustable time delay, refer to model specification •Selectable fail safe/ fail secure operation
- CM-331/332 Series: Active output for external alarm, LED or annunciator
- CM-332/333 Series: Request to exit' and external door contact inputs
- CM-331/332 Series: Optional red/blue/green LED light ring with single gang stainless steel faceplate, indicates switch or door status.

SURFACE MOUNT RIM ELECTRIC STRIKE

- For Crash Bar Exit Device Locksets
- Installs on Hollow Metal, Wood, Aluminum Frames

Camden CX-ED1259L Grade 1 surface mount RIM strikes for exit devices offers the very best strike quality, performance, with the added value of latch monitoring and two spacer plates. The 'Universal' strike design delivers unparalleled application flexibility, with field selectable 12/24V, AC/DC voltage, fail safe/fail secure operation and horizontal adjustment.

- UL 10C/ULC 410 fire listed (3 Hr.) •UL 1034 Burglary and UL 294 Security Listed
- 'No Cut' surface mounted •'Universal' design with selectable 12/24V, AC/DC and fail safe/fail secure operation
- Single solenoid operation provides superior strike reliability
- Tamper resistant stainless steel construction
- (2) spacer plates and horizontal adjustment insure proper latch entry in all applications
- 1/2" to 3/4" latch projection
- Latch monitoring included
- Non-handed, plug-in wiring harness
- 5 Year Warranty

'UNIVERSAL' GRADE 1 ANSI FIRE ELECTRIC STRIKE

- For Cylindrical Locksets • Installs on Hollow Metal Frames

Camden CX-ED1410 Grade 1 ANSI fire rated strike for cylindrical locksets offer the very best strike quality and performance, with a stainless steel faceplate provided. The 'ANSI' fire strike design delivers unparalleled application flexibility, with field selectable voltage and fail safe/fail secure operation. Note: Fire rating applicable only while in fail secure mode.

- Centerline latch entry for cylindrical locksets, with ANSI square faceplate
- UL/ ULC 90 minute fire rated, UL 1034 Burglary listed
- 5/8" to 3/4" latch projection (throw)
- Selectable 12/ 24V, AC/DC
- Selectable fail safe/fail secure. Fire rating voided in fail safe mode
- Continuous duty operation
- Non-handed
- 5 Year Warranty

VMP 19" HEADEND RACKS

19" Open frame equipment and headend racks from VMP are the solution to equipment and data cable management challenges that installers are confronted with regularly. Focused on ease of assembly, functionality, safety and compatibility, each of our racks insure that installers have the solutions they need to address all of their low voltage requirements.

WIRELESS AUDIO PROGRAM TRANSMISSION

FM WIRELESS

With a transmission range of more than 25,000sq/ft, the FM transmitter provides high quality audio transmission for maximum reception. Broadcast audio wirelessly from a TV or any audio source with an audio output jack. With the FM system from Broadcastvision Entertainment, users listen on their Walkman-style FM radios, FM enabled MP3 players/mobile phones or plug their headphones into our stationary receivers that are mounted on the cardio equipment.

FM TRANSMITTER FEATURES: Includes power supply, audio cables (3.5mm-RCA, digital optical), tune to Sign (w/ vinyl numbers) & mounting bracket. •Fully selectable through FM-band (88.1-107.9) •Transmission Range 25,000+ Square Feet •High visibility digital LED interface for maximum ease-of-use •Option for 100kHz and 200kHz channel spacing selection •Line Level Stereo Input •Telescoping and rotational antenna for maximum application flexibility

TONE GENERATOR

The TG4C is designed to produce four different types of tones for use as alarm or announcement signals in paging systems. An audio signal can be routed through the TG4C to allow easy installation in paging systems.

- 4 types of tones: steady, pulsed alarm, slow whoop, and chime •Tones triggered by external contact closure (momentary or long duration) •Choice of continuous generation of tones or two-burst operation (except for steady tone) •External audio signal can pass through TG4C and is suppressed during tone generation
- 600-ohm output •Wide power supply range, 12V-48Vdc @30mA (power supply not included) •6-3/4"W x 5-3/4"H x 2"D

TELEPHONE PAGING AMPLIFIERS

15, 35, 60, 100, 250 & 600 WATT

Bogen's TPU-Series of wall mounted amplifiers are the ideal choice within the telephone paging industry. With five models to choose from, ranging in power from 15 watts to 250 watts, each model provides signal-activated, auto-matic muting of background music during a telephone page, and gradual return of music following a page.

- 15, 35, 60, 100 and 250 Watt models specially designed for telephone paging systems
- 3 inputs on TPU250 and TPU-B models: 1 TEL, 1 MIC (Lo-Z), 1 AUX (Hi-Z)
- 2 inputs on TPU15A: 1 TEL, 1 AUX (Hi-Z)
- Sensitivity: 0.3 mV, MIC; -20 dBm, TEL; 85mV, AUX
- 600-Ohm balanced TEL input for direct connection to page ports and adapters
- TEL input has Automatic Level Control (ALC) for constant page announcement level
- Separate MIC input for a low-impedance push-to-talk microphone (TPU-B models only)
- Music input- mutable by external contact closure (TPU-B models only) or activity on TEL input
- Separate volume controls for mic, paging, background music, and night ringer
- Built-in night ringer can be activated from 90V ring signal (TPU-B and TPU250 models only) or external contact closure
- 25V and 70V constant-voltage outputs, balanced and unbalanced; also 8-Ohm on TPU15A
- Wall-mount design
- TPU-B models may be rack mounted using RPK82 rack mounting kit (sold separately)
- TPU250 designed to rack mount directly
- RCA jacks provided to allow amplifier bridging to double the number of amplifier inputs and outputs (TPU-B models only)
- Thermal and electronic overload protection (TPU-B models only), resettable circuit breaker (except TPU250), Slo-Blo fuse on TPU250.

SINGLE- ZONE UNIVERSAL TELEPHONE INTERFACE

The UT11 is a universal telephone interface that provides single zone

paging for one-way applications such as self-amplified speaker systems. It is compatible with all standard analog port types and includes 2 audio outputs with level controls, each of which can provide audio for 150 Bogen self-amplified speakers. A built-in 24DC, 1 Amp power supply is provided for powering amplified speakers. Two-year warranty.

MODULAR PAGING / ZONE CONTROL SYSTEM FOR 1-99 ZONES

PCM2000

The Bogen PCM2000 is a modular telephone paging and control system.

The Bogen PCM2000 Zone Paging System is designed for direct connection to loop start and ground start trunks, to PBX or KEY paging ports which supply DTMF capability, and to analog T/R lines. The unit allows total system amplifier power of up to 250W.

The PCM2000 features:

- Simultaneous high & low power paging
- Zone and zone group paging (32 paging groups, each with up to 99 zones)
- Built-in talkback amplification (requires PCMTBM module)
- Background music assigned per zone
- Local BGM sourcing capability
- Night ringer zone group
- Emergency zone group with choice of built-in tones or outside tone source
- Emergency all-facility page override
- Eight daily time-triggered signaling events (requires PCMTBM module)
- Daily master clock synchronization
- Relay driver per zone
- Auxiliary contacts

The PCM2000 basic system supports up to three paging zones and consists of only three modules:

PCMCPU module includes a set of DIP switches to set the system ID, a Program/ Run switch that allows system programming, a Power jack for 12V DC power, and audio connections for central amplifier; low-power BGM, high-power BGM, emergency/ shift change trigger, and auxiliary trigger.

PCMTIM telephone interface module incorporates a universal interface so that connection to any telephone system is rapid and trouble-free. The module connects to the telephone via a standard RJ11 plug and is programmed simply by using common DIP switches. All other connections are made to built-in terminal blocks using only a small screwdriver.

PCMZPM – zone paging module can operate high-power or low-power paging systems (only one type per PCMZPM module). For high-power paging, a single amplifier can be used for paging and supplying background music (when not paging). Background music can also be continuously supplied to all zones not being paged with the addition of a second amplifier.

A talkback module (**PCMTBM**) can also be added to the system to provide hands-free talkback capacity. Only one talkback module is required regardless of the number of zones or satellite systems on the PCM2000 system.

PCMSYS3: 3 ZONE FACTORY ASSEMBLED PCM SYSTEM.....\$ 520.00

3 Zone PCM System is a convenient factory assembled system. It includes 3 modules (PCMCPU, PCMTIM, PCMZPM). There is no need to assemble and wire the PCM modules together- just mount the unit, program it, and you're finished.

EASY INSTALL / EASY DESIGN SPEAKERS SURFACE-MOUNT CEILING SPEAKER

Easy Install Speakers drastically cut system installation time because each speaker can be completely installed, mounted in the ceiling, secured, and connected- in less than a minute! This versatile speaker carries voice messages with clarity anywhere dependable communication is required. It can be installed in any suspended ceiling with ceiling tiles... quick, easy, and trouble-free. Compatible with both 70V and 25V systems.

- Installs in Seconds. Each speaker assembly is specially designed for immediate installation as soon as you take it out of the box... complete installation takes less than a minute.
- No-Tool Installation. No tools needed; everything you need is right in the box.
- Contemporary, Low-Profile Design. Looks good in any environment.
- No Clean-Up. Installation means piercing ceiling tiles, NOT cutting them. So, there's virtually no mess and no ceiling tile pieces to clean up.

NEAR A-SERIES SPEAKERS

The Ultimate Pairing of Performance and Durability NEAR® A-Series Loudspeakers NEAR A-Series speakers set the standard for smooth, accurate sound, attractive appearance and rugged construction. Designed to perform beautifully under the toughest conditions, the A-Series combines outstanding industrial design with NEAR-patented speaker technology for unsurpassed audio quality and weatherproof durability.

Sound Design, Through and Through

Form follows function in the A-Series. Its rounded ends and unique side corrugations give the speakers their characteristic "armadillo" look and are designed to reduce cabinet resonance and improve sound quality. The heavy, molded speaker cabinets are made from a unique, UV-inhibited mineral-filled polypropylene, making them extremely durable and giving them excellent acoustic properties. All mounting hardware is rust-proof ... from the ergonomic, over-sized mounting knobs to the heavy-gauge aluminum or stainless steel brackets, which are powder-coated to resist chipping and scratching. So, whether you need an A-Series speaker for a frosty ski slope or baking in the sun and salt spray seaside, you can count on it to look good and sound great.

METAL DIAPHRAGM TECHNOLOGY (MDT™)

All NEAR® speakers feature MDT, metal alloy cones and tweeter domes for optimum sound quality, reduced listener fatigue, and flawless performance and reliability even under extreme temperatures for many years.

MDT is lighter, stiffer, faster

NEAR's Metal Diaphragm Technology (MDT) alloy cone is ceramic-hardened aluminum formed to a catenary dome shape to increase rigidity. Specially designed geometric ribs further stiffen the cone and break up resonance modes.

MDT delivers all the details, naturally

MDT diaphragms reveal the hidden nuances in music without sounding "bright" and etched. Listeners enjoy a clarity of sound refreshingly devoid of stridency, sizzle and false brightness.

MDT Benefits:

- Higher rigidity and lower mass than traditional papers and plastics,
- Retains its rigidity and shape over a wider range of ambient temperatures
- Fast transmission of sound through the diaphragm means low energy storage
- Efficient heat-sinking of voice coils under long-term, high-power conditions for greater reliability

LINE ARRAY 70V/ 8-OHMS LOUDSPEAKER SYSTEM

400W Continuous/ 800W Peak

ALA C1B

The Apogee ALA-C1 Line Array Loudspeaker is a high fidelity, 70V/ 8-Ohm, passive, 2-way fixed column, all weather, indoor/outdoor loudspeaker designed for superior quality speech enhancement and music reproduction in small- to medium-sized venues, such as school and civic auditoriums, community theaters, lecture halls, and houses of worship.

The design offers extremely broad, horizontal dispersion (140-degrees) and focused vertical dispersion (25-degrees) – which is ideal for uniform side-to-side coverage, while minimizing ceiling and floor reflections that could degrade intelligibility.

- Frequency Response (1M on axis): 150Hz-18kHz (+/- 3 dB)
- Sensitivity (1W @ 1M): 93dB •Max. SPL (@1M): 118dB Continuous/ 121dB Peak •70V Transformer Taps: 128W, 64W, 32W, 16W, 8W @ 70V •43" (110cm) line array •Powder coated 6063-T5 extruded aluminum alloy enclosure with internal ribs
- 6 x 1" metal alloy diaphragm tweeters with Ferrofluid damping, UV and chemical resistant rubber surrounds, corrosion-resistant magnets
- 9 x 4" metal alloy diaphragm woofers, with Ferrofluid voice coil guidance, UV and chemical resistant rubber surrounds •IP65-rated for use in any environment

THE CORE 400 Watts @ 8 Ohms, 2-WAY INSTALLATION SPEAKER

The CORE CR12 uses a constant directivity asymmetrical rotatable horn and passive crossover for exceptional high end range and convergence. This provides extremely flexible coverage patterns, giving width when needed, and narrowing so that the amount of ambient sound is reduced.

- Rotatable Asymmetrical Horn: 100/50 degrees(H) x 55 degrees(V)
- 20 Integrated M8 threaded suspension points •Pole Mount
- Integrated handle on the rear of the speaker •2 Twist-Lock parallel input jacks plus barrier terminal input. •Paintable texture coated wood cabinet •Peak Power Handling: 1500 Watts •Freq. Resp.: 55 Hz-18 kHz •Size: 22.83"H x 14.01"W x 15.74"D/ Weight: 43.85 lbs

HIGH POWER INTERCOM/ PROGRAM CONTROL CENTERS

•Communication with up to 25 remotes (PI-35A) or 75 (SI-35A) •Instant emergency/ all-call paging •Separate 35 Watt program and 20-watt intercom channels •Tone calling; light identifies calling remote •Time signal, night bell, or telephone paging capabilities •Color-coded controls for easy operation •Executive styling •Uses 3 conductor shielded cable (18, 20 or 22g)

The PI-35A and SI-35A are handsome, dual-channel units designed to serve the intercom, paging, and background music needs of schools, business and institutions. The PI-35A provides communication with up to 25 loudspeaker-equipped locations and can distribute program material from external sources such as microphones, FM/AM tuner, or cassette player.

The SI-35A serves up to 75 rooms or remote locations and provides custom flexibility in a space-saving design. Furnished with 25 room selector switches. It has space for 75, or for a CPT-1A cassette player-FM/AM tuner and 50 room switches.

Both models have a built-in 20-watt intercom amplifier and a separate 35-watt program amplifier. These permit instant communication with any location without interrupting music distribution to others.

The control panels feature color-coded buttons and guides, with step-by-step instructions, allowing even first time users to operate the system easily. Emergency announcements to all speakers are accomplished with a push button and take precedence over all other system functions. Facilities are also included for all-call distribution of a tone signal (for classroom changes or telephone "night bell") or telephone paging.

Remote stations may be wall-mounted or ceiling-mounted loudspeakers, or horn-type speakers in high-noise or outdoor locations. They reply hands-free when called. A call-in switch can be provided at any remote station where call-initiation capability is desired. When the control center selects a remote for intercommunication or monitoring, the remote receives a repeating tone signal. Calls to the control center are announced by tone signal and identified by light annunciation.

The control centers are enclosed in compact consoles, finished in attractive simulated walnut. They provide a 25-volt balanced line output and operate from a 120 VAC source. Power consumption is 100 watts, max. Installation is easily accomplished with crimp-on connectors. The SBA225 room selector and annunciation panel may be used to add room capacity to the SI-35A in increments of 25 rooms.
