

CUSTOM LENGTH POWERED SOUNDBAR

As displays get bigger and slimmer, audio output suffers. The TruAudio Custom Length Powered Soundbar has been designed to add an immersive listening experience to complement almost every flat panel display on the market. Available in a two-channel configuration with carbon fiber or polypropylene drivers and just a mere 2.4" depth. Both configurations boast impressive bass response for the woofer size, while maintaining the crystal clear highs TruAudio customers have enjoyed for years. The soundbars can be custom ordered to match displays with physical widths of 42.9" to 57.9" and 61" to 68" with a beautifully matched custom grill. The custom length powered models can be shipped out within three business days with a one day expedite option. The onboard amplifier features Analog, ToS and Bluetooth inputs as well as a wireless subwoofer output. Control options include hardwire 3.5mm IR jack and IR eye. The soundbars can be elegantly mounted to a vertical surface, or attached to the bottom or top of a TV with the optional bracket.

SB-CPSB-C

Type: Low profile custom length powered soundbar
Woofer: (2) 4.5" carbon fiber
Tweeter: (2) 1" titanium
Passive Radiator: (2) 4.5" carbon fiber
